Job Description

Business Analyst Intern (Full Time / Part Time)

Do you have a passion of all things digital and an interest in solving complex business problems?

Grow your capabilities and experience as a Deloitte Digital intern, while gaining insight into our culture, innovative work and career opportunities.

We are looking for a talented business analyst intern with exceptional problem-solving skills to join our Technology – Digital practice. If you’re an outside-the-box thinker who enjoys exploring the myriad ways technology, strategy, and process improvement help shape the future of our clients’ organizations, then you may be the right fit for the role.

Deloitte Digital

Deloitte Digital is creating a new model for a new age — we’re a creative digital consultancy. We bring together all the creative and technology capabilities, business acumen, and industry insight needed to help transform our clients’ businesses. With our end-to-end capabilities, clients can bring us their biggest challenges, knowing we’ve got what it takes to bring a new business vision to life with digital.

We are creative, visionary minds of many disciplines who put future-forward thinking into projects that push the edges of digital technology. Our clients seek us out for that reason. And what’s even better — we have a blast doing it.

At Deloitte Digital, strategy, creativity and technology intersect.

Sound awesome? It is.

Responsibilities as a Business Analyst Intern

Our Digital business analysts work in a fast-paced, rotational environment that exposes them to multiple project experiences across a wide spectrum of sectors. You’ll work under the guidance of senior resources to help deliver world class digital solutions to our industry leading clients to enhance their organizations’ productivity, performance, and long-term profitability. Examples of duties include

- Assist in determining the requirements of clients’ projects and programs by defining, analyzing, and managing requirements to help fulfill clients’ business needs.
- Produce well-articulated reports, plans, specifications, business cases and other deliverables.
- Drive the research and analysis on client projects, including interviewing, identifying relevant secondary resources, developing hypotheses and presenting findings

We pride ourselves on our quality and speed of delivery and you’ll get to work with and learn some of latest technologies, tools and techniques that allow us to continually out class our competition.

You’re expected to be a key contributor to the work that we do, but, you’re not expected to go at it alone. Along the way, you’ll have access to mentoring, counselling, and training opportunities to help foster and accelerate your development of new skills and capabilities.
Requirements

Digital strategists come from all backgrounds, but to succeed you will need to be intellectually curious, to demonstrate your ability to think in a logical and structured way, and to be creative in your approach to problem solving. Strong numerical skills are also important.

- Undergraduate or postgraduate students from a reputable university with outstanding academic track record. Candidates from all academic majors are encouraged to apply
- Drive and willingness to continually learn new things and progress quickly
- Strong analytical and critical thinker with the ability to solve complex problems and easily communicate findings
- Ability to work independently and manage multiple task assignments
- Strong commercial awareness and passion for digital and technology
- A team player who enjoys working with others to solve problems and sharing knowledge
- Strong written and oral communication skills in English and Chinese
- Right to live and work full time / part time in Hong Kong

Other Desirable Qualities / Skillsets

- Basic understanding in one of the following areas of expertise
  - Cloud Software: Salesforce, ServiceNow, Adobe Experience Manager (AEM)
  - Software Development Approaches: Agile, DevOps, Waterfall
- A digital presence which demonstrates your familiarity with the domain
- Experience of working on strategic issues / projects

Duration

- 1 year / 6 months full time internship
Job Description

Technology Associate Intern (Full Time / Part Time)

Do you have a passion of all things digital and an interest in solving complex business problems?

Grow your capabilities and experience as a Deloitte Digital intern, while gaining insight into our culture and career opportunities.

We are looking for a talented technology associate intern with exceptional problem-solving skills to join our Technology – Digital practice. If you’re an outside-the-box thinker who enjoys exploring the myriad ways technology helps shape the future of our clients’ organizations, then you may be the right fit for the role.

Deloitte Digital

Deloitte Digital is creating a new model for a new age — we’re a creative digital consultancy. We bring together all the creative and technology capabilities, business acumen, and industry insight needed to help transform our clients’ businesses. With our end-to-end capabilities, clients can bring us their biggest challenges, knowing we’ve got what it takes to bring a new business vision to life with digital.

We are creative, visionary minds of many disciplines who put future-forward thinking into projects that push the edges of digital technology. Our clients seek us out for that reason. And what’s even better — we have a blast doing it.

At Deloitte Digital, strategy, creativity and technology intersect.

Sound awesome? It is.

Responsibilities as a Technology Associate Intern

You’ll be responsible for designing, developing and testing cutting-edge applications. You’ll have the chance to work under the guidance of some of the best Developers, UX Designers, and Strategy thinkers in the business, delivering world class digital solutions for some of the biggest and best companies in the world.

For us, Developers are not people who are locked in a room churning out code to match a large paper based specification. They need to work alongside our clients and their customers across the entire project life-cycle and combine deep technical expertise with innovative thinking and a strong understanding of what makes businesses and their customers tick. It’s the combination of these skills and ways of working that helps us deliver the best digital experiences.

We pride ourselves on our quality and speed of delivery and you’ll get to work with and learn some of latest technologies, tools and techniques that allow us to continually out class our competition.

You’re expected to be a key contributor to the work that we do, but, you’re not expected to go at it alone. Along the way, you’ll have access to mentoring, counselling, and training opportunities to help foster and accelerate your development of new skills and capabilities.

Requirements
• Undergraduate or postgraduate students in numerate subjects such as Computer Science or Engineering from a reputable university with outstanding academic track record
• Drive and determination to continually learn new things and develop yourself into a world class digital developer
• Ability to work independently
• Strong passion for digital and technology
• A team player who enjoys working with others to solve problems and sharing knowledge
• Strong written and oral communication skills in English and Chinese
• A balance of strong problem solving skills and innovative thinking

Other Desirable Qualities / Skillsets

• Basic understanding in one of the following areas of expertise
  – Mobile App Development
  – HTML 5, CSS 3, JavaScript, C-style languages, SQL

Duration

• 1 year / 6 months full time internship
