Test automation — Automation of what?

**Speaker**  
Dr Yvan LABICHE  
Associate Professor  
Chair  
Department of Systems and Computer Engineering  
Carleton University, Ottawa  
Canada

**Date**  
22 October 2018 (Monday)

**Time**  
10:00 am - 11:00 am

**Venue**  
CS Seminar Room, Y6405  
6th Floor, Yellow Zone Yeung Kin Man Academic Building  
City University of Hong Kong  
83 Tat Chee Avenue  
Kowloon Tong

**Abstract**

Taking a birds-eye view at the different activities that take place when someone engages in software testing, we will discuss automation problems and some deployed solutions to the broad notion of software test automation. In doing so, we will discover engineering/deployment problems as well as more fundamental scientific/research issues.

**Biography**

Dr Yvan Labiche received an engineering degree in Computer System Engineering in 1995, from the graduate school of engineering: CUST (Centre Universitaire des Science et Techniques, Clermont-Ferrand), France. He completed a Master of fundamental computer science and production systems in 1995 (Université Blaise Pascal, Clermont Ferrand, France). While doing his PhD in Software Engineering, completed in 2000 at LAAS/CNRS in Toulouse, France, Yvan worked with Aerospatiale Matra Airbus (now EADS Airbus) on the definition of testing strategies for safety-critical, on-board object-oriented software systems. In January 2001, Dr Yvan Labiche joined the Department of Systems and Computer Engineering at Carleton University, as an Assistant Professor. He is now Associate Professor and chairs the department of Systems and Computer Engineering at Carleton University (Ottawa, Canada).

All are welcome!
